Evaluation Lab 5 - Hive
----

1) create table Startups
Look at the data and decide the columns along with their data types
2) Use LazySimpleSerde for table creation
3) LOAD DATA from the file Listofstartups.hive
4) Make sure that the header line won't be the part of loaded data
5) Verify that data loaded properly
6) Any issues after using above serde? Note down the issues in your
answer
7) Find a right serde for this data (You can google it)
8) Find which sector has the most startups?
9) Find which State has the max number of startups?
10) Find the total startups from "Maharashtra"?
11) How many startups were formed in "Healthcare"

Dataset -
        Labs/hive/data/Listofstartups.csv
